The high light intensity with flash light mode provides for short exposure times without camera shake and eliminates the impact of distracting light sources. The continuous light mode can be used for video and photo shots. Furthermore the SMD LEDs serve as a setting light with flash operation and are dimmed proportionately to the flash light.

RSP Column with Positioning Control

The well-proven RSP Column (5612) is now also available as RSP autoDrive 1.5 (5613) with positioning control. Four height positions can be saved easily via the new cable remote control and recalled accurately with one keystroke. The repeat accuracy is 1/100 millimeter. Alternatively there is the possibility of a computer-controlled operation.
